CAS Project No.: 98-0524

CAS Profile No.: 13

Project Description:

The City of Moore Haven Effluent Reclamation Wetland Disposal Project consisted of construction of a 225,000 gallon per day five (5) celled wetland disposal system including an effluent pump station. Work also included the installation of approximately three (3) miles of 8-inch effluent force main and two (2) directionally drilled mains from the City/County Public Works sewer plant along County Road No. 720 and State Road No. 78 to a man-made wetland. The total design costs for the project was \$159,000. Total construction cost was \$298,550. The project began in 1998 and was completed in 2001 without liquidated damages. CAS assisted in securing funding for this project, in its entirety, through state or federal grants.

Responsibilities:

Survey, preparation of engineering and construction plans, cost estimates, permitting, bidding assistance, construction management and construction observation, project close-out/start-up services and grant funding acquisition assistance.

Key Personnel:

Gene R. Schriener, P.E. – President; Robert D. Keener, P.S.M. – Vice President of Survey; William H. Landis – Senior Supervising Engineer; Greg Giarratana – Senior Supervising Engineer; David Hansen – Senior Field Representative
